

Hear and Learn UConnect SoundHouse

How to Turn Two Learning Spaces Into One With Hear and Learn SoundHouse

**Do you have two learning spaces separated by a removable wall?
Want those rooms to operate independently, and also as one larger space?**

With Hear and Learn SoundHouse in each space, use the Flexmike in either neighboring room as a transmitter - you can plug a sound source into the Flexmike so that all audio from the 'Master' SoundHouse is sent to the 'Slave' SoundHouse.

With teachers wearing Flexmikes or Sharemikes paired to the master SoundHouse, all audio including voices and AV will be heard across both spaces.
